SUMMARY

Full-Stack Developer with around 4 years of experience building scalable, high-performance web applications using React, Next.js, Node.js, and Java Spring Boot. Experienced in frontend architecture, state management, REST API design, and AWS cloud deployment using services such as ECS and S3. Strong track record of improving application performance, streamlining workflows, and delivering reliable, production-ready features across the full development lifecycle.

EXPERIENCE

Software Developer (Full-Stack)

Tulip Technology Solutions

September 2025 – Present

Hyderabad, Telangana

- Built and maintained a scalable full-stack business management platform using **Next.js, React, Java Spring Boot, and REST APIs**, powering core workflows including lead management, estimates, job scheduling, inventory, and analytics.
- Delivered end-to-end business features by designing and integrating **Java Spring Boot REST APIs** with **React/Next.js** applications, owning development across frontend, backend, and API integration layers.
- Improved application performance by introducing **Zustand for centralized state management**, eliminating redundant API calls and reducing dashboard initial load time from **5–6 seconds to 1–2 seconds (70% improvement)**.
- Independently designed and developed a **real-time communication system** using Next.js, Node.js, and **WebSockets**, enabling manager-agent chat and global broadcast functionality.
- Optimized rendering performance for large datasets using list **virtualization** and **debouncing** techniques, ensuring smooth UI interactions.
- Deployed backend services on **AWS ECS** and integrated **Amazon S3** for secure file and attachment storage, supporting reliable application releases and production workflows.
- Established a high-reliability codebase by implementing **Jest**-based testing with **90%+** coverage, minimizing regressions.

Full-Stack Developer

Infosys (2.8 years)

March 2022 – Nov 2024

Bhubaneswar, Orissa

- Developed complex modules for **Business Partner Management** and **Shipyard logistics** dashboards in a large-scale enterprise application.
- Contributed to backend support by maintaining and debugging **Java Spring Boot REST endpoints**, identifying and fixing recurring API issues to reduce production bugs.
- Reduced manual effort by **20%** by streamlining partner documentation and container tracking workflows.
- Increased development efficiency by **35%** by building a reusable component library and standardizing UI patterns.
- Collaborated with cross-functional teams to deliver features within deadlines in an Agile environment.
- Leveraged **Jira** and **Git** throughout the SDLC to manage high-priority sprints and established a robust testing suite with Jest, ensuring 85%+ unit test coverage to maintain code reliability.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux/Zustand, Responsive Design

Backend: Java, Spring Boot, REST API Design, Node.js, Microservices, WebSockets

Cloud DevOps: AWS (ECS, S3, EC2), CI/CD, Git, GitLab, Jenkins, Docker (basic)

Performance & Concepts: React Performance Optimization, Memoization, Virtualization, SSR/CSR, WebSockets, Lazy loading

Testing: Jest, Unit Testing, SonarQube, Code Reviews

Tools: Git, GitLab, Jira, Jenkins, Postman

EDUCATION

Dr. B.C Roy Engineering College

B.Tech in Computer Science and Engineering, 8.15 CGPA

Durgapur, West Bengal

July 2017 – June 2021
